

# H.R. McMILLAN PLANITARIUM

This **90-seat multimedia theatre** combines live action and audio-visual presentations. Programs provide regular updates of space news and space technology with special highlights of Canada's role in space.

These highly interactive shows where the audience is encouraged to participate run about 20 minutes in length.

The leading-edge technology of the **Zeiss projector** creates a 360-degree view of the heavens seen from Vancouver.

Not only can visitors view the night sky, but also are entertained with changing multimedia presentations including our famous laser musical productions and a variety of original shows created by the H.R. MacMillan Space Centre.
